

PAC9 PCC

PAC 9 is a pistol-caliber carbine, or PCC. It is chambered in 9mm Para (9x19mm) and uses popular Glock pistol magazines. It operates on the blowback principle and has a functional bolt catch that holds the bolt in the rear position after the last shot.

Like our PAC15 rifles, we have equipped the PAC9 with an M-LOK handguard, ergonomic pistol grip, and reinforced stock. The set also includes polymer folding sights.

PAC9 PCC - 12"
